#### **DETAILED ACTION**

#### Priority

Acknowledgment is made of applicant's claim for foreign priority under 35
 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 2000-383933, filed on 12/18/2000.

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

 Claims 2,5 are recites the limitation "the fixing portions " There is insufficient antecedent basis for this limitation in the claim.

#### Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in-
- (f) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
- (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).
- Claims 1-5,7-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Sunaga US patent 6.370026

Sunaga'026. discloses a brushless motor (1) Fig. 14, column 3,line 9 )comprising, a stator(25, column 3, line 23) comprising a plurality of exciting coils (21, Fig. 14, column3, line 1)) ,a rotor (Fig. 14) rotatable relative to the stator, an electric circuit board (35, Fig. 9 column4, line 17) comprising a control circuit (7,27 drive circuit section column 3 line 21-23) for controlling rotation of the rotor, a heat sink (5, Fig. 17, column 3, line 47), comprising a heat radiating, fins and legs (43 Fig.15, column 3 line 60), plurality of switching devices (29 Fig. 1 ,column3 line 25-28 ),a pressing member comprising a pressing portion (37), a pair of positioning portions (61) extending perpendicularly from opposite end portions of the pressing portion, and a pair of connecting portions (63a) projecting respectively from the pair of positioning portions (63b), and a pair of fixing portions (63b), wherein each of the supporting legs of the heat sink (5) comprises a positioning projection for suppressing misregistration of the switching devices (29,Fig.1) relative to the heat sink and a connecting projection (63a) for connecting the heat sink and the pressing member (37 Fig.1.7) the positioning projection and the connecting projection project form an inside surface of each of the supporting legs inwardly, each of the switching devices has a plurality of terminals(33.Fig.4 column 3.line 38) which are perpendicularly bent at a near portion to a transistor (MOS transistor column 3 line 34)of the switching device, and free end portions of the terminals are inserted to predetermined positions of the electric circuit board and are electrically connected with the electric circuit board by means of soldering( column 3 line 39-45, Fig. 4 ), the pressing member is made by blanking plate-spring material into a predetermined shape

and by bending predetermined portions of a member of the predetermined shape (37,Fig.7, column 3 line 47-50) wherein outer surfaces of the supporting legs of the heat sink are inherently machined into rough surface.

## Allowable Subject Matter

6. Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

# Communication

 Any inquiry concerning this communication or earlier communications from the examiner should be directed to Iraj A Mohandesi whose telephone number is (703) 305-3242. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nestor Ramirez can be reached on 703-308-1371. The fax phone numbers for the organization where this application or proceeding is assigned are (703)872-9314 for regular communications and (703)872-9314 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703)306-0377.
